MAY SUMMARY

- 17 working days captured through May 25 – on a per-day basis, NDs at 88/day vs April 80/day
- Gold rate recovered from 13,523 low (May 6) to 14,032 by May 26 – still 2.9% below pre-crash peak of 14,452
- Federal Bank's loan process change has increased TAT per loan, compressing effective daily capacity and suppressing takeover throughput
- Although renewals are picking up vs April (+41% daily), the 2% LTV reduction during renewal processing has kept daily renewals 40% below Jan-Mar levels (73/day currently vs 123/day in Jan-Mar)
- AUM has crossed the 1,200 Cr mark – up 34.6% since Jan 2026
- Week 20 (May 11-17): 487 NDs / 26.7 Cr – strongest week of the month, recovery signal into June
- Fresh loans now 66.5% of new disbursals (vs 46.7% in Feb) – mix shift driven by takeover compression

WEEK-BY-WEEK HIGHLIGHTS

- **Week 18 (Apr 27 – May 3):** Opened soft as gold dipped to 13,523 on May 6 – the monthly low. 409 NDs despite the rate pressure reflected decent underlying demand.
- **Week 19 (May 4 – May 10):** 4-day week post-holiday. Volume eased to 383 NDs but value per loan improved as the takeover mix held at 103. Rate recovery underway.
- **Week 20 (May 11 – May 17):** Standout week at 487 NDs / 26.7 Cr. Gold climbed back above 13,860 triggering a surge in both fresh (304 FL) and takeover (157 TO) disbursals – highest TO count of the month.
- **Week 21 (May 18 – May 25):** 455 NDs / 24.7 Cr. Volume moderated off the Week 20 peak, a normal pattern. Gold closed May at 14,032 – trajectory into June is positive.

TAKEOVER PERFORMANCE – CONTEXT VS APRIL AND LATE MARCH

Avg daily takeovers in May: 26.2/day vs April 25.0/day – flat on a per-working-day basis; the headline volume decline of 18.8% is a calendar effect (17 vs 22 working days). Federal Bank process changes have increased TAT per loan, directly compressing daily takeover throughput. In late March (comparable rate environment post-crash), TOs ran at approximately **40–45/day** as LTV recovery supported underwriting. A rate hold above 14,000 combined with TAT resolution should push TO volumes toward 30–35/day in June. Feb context: 61.8 TO/day in Feb reflects a different pipeline environment and is not directly comparable.

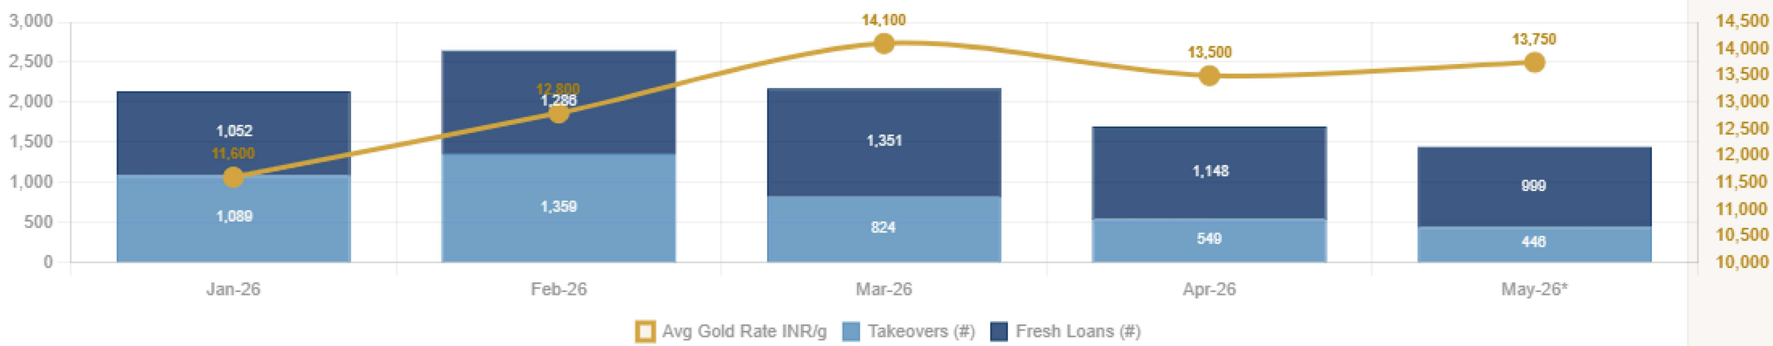
MONTHLY GOLD RATE CONTEXT VS FRESH LOANS AND TAKEOVER VOLUMES (JAN – MAY 2026)

Fresh Loans (bars, left)   Takeovers (bars, left)   Avg gold rate INR/g (line, right)



Gold rates drove the Jan-Feb expansion: FL averaged 1,052-1,286/month, TOs surged to 1,359 in Feb as rates crossed 13,000+. The Mar crash compressing rates to sub-13,000 immediately impacted TO economics. **May's rate recovery to 14,032 has not yet translated to TO volume recovery** – avg daily TOs at 26.2/day (May) vs 25.0/day (Apr), because Federal Bank's increased TAT per loan is constraining daily throughput. **Releases in Hyderabad, Chennai, and Vijayawada are the primary drag on GUM addition** – Hyderabad alone saw 53.41 Cr in releases this month (vs 66.06 Cr disbursed, net addition of just 12.66 Cr). Vijayawada is net negative (−1.26 Cr) with releases exceeding new disbursals. Chennai and Hyd together account for 59% of total May releases.

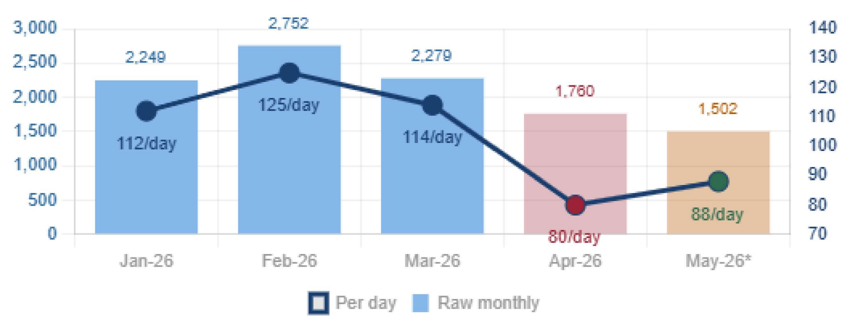
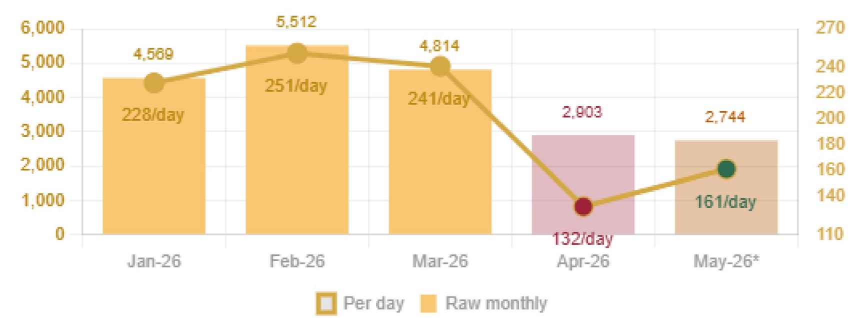
Raw monthly   Per day (line)



TOTAL DISBURSALS – RAW MONTHLY VS PER WORKING DAY

Raw monthly   Per day (line)



The headline May decline of 14.7% in new disbursals is a **calendar effect, not a business deterioration**. On a per-working-day basis, May (88 NDs/day) is running materially ahead of April (80/day). Total disbursals per day have also recovered to 161 from April's 132. If May runs to 21 full working days, the implied full-month ND count is approximately 1,855 – above April's 1,760 on a raw basis.

Gold under management reached **1,225.5 kg in May 2026**, up from 1,216.43 kg in April. The net addition of **9.15 kg** is significantly below the 6-month average of ~36 kg. The primary driver is elevated releases concentrated in three cities: **Hyderabad (53.41 Cr released vs 66.06 Cr disbursed), Chennai (20.75 Cr released vs 23.45 Cr disbursed), and Vijayawada (8.54 Cr**

released vs 7.28 Cr disbursed – net negative). These three cities account for 65.8% of total May releases (82.70 of 125.72 Cr). Net additions should recover alongside gold rates in June, particularly as renewed loans at lower LTV reduce the incentive to release.

Federal Bank anchors **96.6% of the GL book at 1,067.6 Cr**. Total AUM of 1,211.1 Cr (GL + SL) reflects continued growth despite May headwinds – crossing the 1,200 Cr mark for the first time. City-wise, Hyderabad leads GL AUM at 541.21 Cr (44.7% of total AUM), followed by Bengaluru (239.55 Cr) and Chennai (179.70 Cr). SL book at 105.7 Cr is diversified across Tenmark, Kumbhat, and Sunita Finlease. Lender concentration in GL remains the key structural risk – Federal Bank dependency requires active diversification planning through FY27.
